24-Nov-2014	Product Retirement Notice – E-Flex 3i Indoor Microphonic Intrusion Detection Sensor

E-Flex 3i Product Retirement

Since its introduction almost 20 years ago Senstar's E-Flex 3i indoor microphonic intrusion detection sensor has provided reliable cost effective protection for building interiors.

As part of its program of continual product development Senstar has introduced a successor to E-Flex 3i, FlexPI. FlexPI provides all the benefits of E-Flex 3i in a smaller and lower-power package that also offers the option of configuration via USB.

Following the introduction of the FlexPI to the marketplace in 2011, Senstar herein informs its valued customers, dealers, and representatives of the planned retirement of the E-Flex 3i system.

The affected part numbers are:

- 400464-002, E-Flex 3i indoor microphonic sensor
- 400464-004, E-Flex 3i indoor microphonic sensor

The planned Product Retirement milestones are as given in the table below.

Remaining product quantities are limited and will be sold on a first-come, first-served basis.

Date	Milestone
24-Nov-2014	Product Retirement Notice issued (this bulletin), affected products are still available for new sales
31-Mar-2015	Product no longer available for new sales, repair services remain available
31-Dec-2015	Complete end of life – all repair services discontinued
